

# Creating Large Number of Small, Home Hospitals for Covid 19, to meet the challenge of 3rd wave

Create a Covid Care Home hospital

1. Equipment
  - a. Sanitiser
  - b. Surgical Gloves
  - c. Surgical Masks
  - d. BP monitor
  - e. Oximeter
  - f. Thermometer
  - g. Steam inhaler
  - h. Oxygen can 1 ltr 10 nos.
  - i. 4 oxygen cylinders of 650 litres each and Medical Oxygen Cylinder 2200 ltr capacity
  - j. Oxygen concentrator 1-5 ltr/ mi 24\*7
2. Alongside need few 5-6 trained nurses for 24\*7 attendance taking guidance from a qualified doctor on mobile / telephone
3. Contact nos. of few expert doctors on the subject.
4. Train a few family members/ neighbours to work as nurses for this limited task?

This will take care of at least 90% percent of Corona Positive people and give breathing time of 4-5 days to search a bed in Covid ICUs of public hospitals.
